

CLC bio Workshop

Presenter: Marta Matvienko, Ph.D.

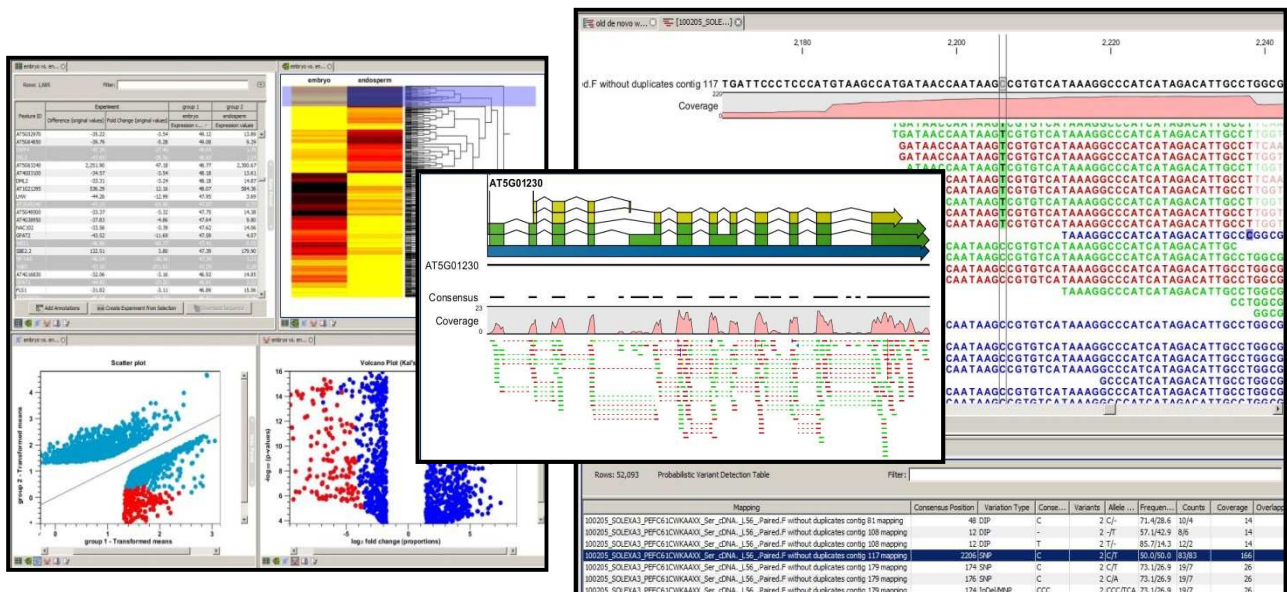

1. Introductory presentation: products, applications, and recently released tools
2. Installation of Genomics Workbench, basics of data navigation
3. Hands-on:
 - Data import, working in tracks, resequencing
 - *De novo* assembly
 - RNA-Seq

Supported Applications and Products

- *de novo* assembly
- Mapping and Variation calling
- RNA-Seq and ChIP-Seq
- Small RNA analysis
- Desktop Applications
- Enterprise Solutions
- Plugins
- Consulting

New Tools and Plugins for NGS data analysis

- Track Tools
- Workflows
- Extract Consensus Tool
- Large Gap Mapper and Transcript Discovery
- Microbial Genome Finishing Module
- Blast2GO Plugin
